

**Bob and Mary Ehmann**  
**Echo Ranch - Haines**  
*Update:* **April 27**

**What is Happening?**

A lady whose parents had worked at the camp for years passed on a lot of paperwork and information so during the 4.5 hours on the ferry, Brett and I learned a lot of history and were better prepared for what we faced.

Finally found the vehicle titles that night so the next day, went in to get them changed. It was scheduled to be closed because the same office gave driver tests, but when we walked in the door was open and the lady informed us that the person to take the driver's test did not show so were able to get them changed.

We had not received the official copy of the title change so were taking in a copy to the town office, but when we arrived, they informed us that they had the official title already, so turned in the rest of the paper work and the tax exemption application. The lady who took it had been a camper at Echo Ranch.

**Praise**

Had a good but long day flying, bags arrived safely, body time clock and climate adjusted.

Team meetings went well with good discussions in preparation for the summer .

Our trip to Haines went well. Arrived in the afternoon, a local couple met us and let us use their van for the time we were there.

Got the official title for the land registered, the vehicle titles changed, power, phone and internet connected, post office box opened application for local tax exempt turned in.

Was able to get a better picture of some of the needs at camp (especially the septic system), and the local situation and potentials for ministry.

Made some good contacts and potential help for repairs and maintenance.

**Prayer Items:**

We brought vehicle on the ferry to Juneau and will be packing it full of food, supplies, etc. when we take the ferry to Haines on May 5 so need wisdom as to what we will be needing as prices are higher in Haines.

The guy will be coming with us to work on getting the water system up and running so pray that it will go smoothly as he is there for only 3 days and we have a lot of questions especially as we consider the future.

The septic system is not working and we are not sure just what the problem is. Local contractors are very busy so we need to find someone who can help find the problem and then find a good solution.

The camp has a long history with a lot of local involvement so pray for wisdom in building relationships.

*Pray also for us, that God may open to us a door for the word, to declare the mystery of Christ, Col 4:3*
